

# Reagent Highlights

## Kits

Mycoplasma detection  
Biochemical Assays  
Endotoxin Detection & Removal  
ELISA | Immunoassays  
Targeted Metabolomics Kits  
Sample collection/preservation

## Proteins

Proteins | Tetramers  
Western Blot - Gels, Stains,  
Antibodies, Membranes, Buffers

## Cell Analysis

Flow Cytometry  
Cell Stains & Viability Dyes  
Antibodies: Primary  
Secondary | Isotype controls

## Cell Culture

Selective antibiotics  
Antimicrobials  
Cell lines  
Reporter cells  
Transfection reagents

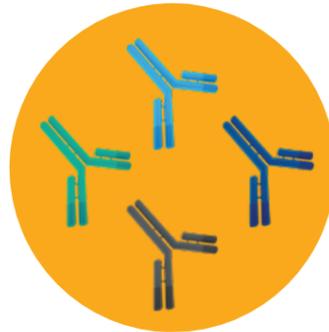

## Small Molecules

Pathway inhibitors  
Innate Immunity ligands

## DNA/RNA

Purification | RT PCR | Oligos  
Ladders | Gel stains  
RNase-free/Endotoxin-free water  
Custom RNA synthesis  
KAPA NGS reagents

## Multiplex

IHC | ISH | Phosphorylation  
| Protein Arrays | Cytokine Arrays  
Antibody Arrays
